

AREMA

SHORT FACTS ABOUT US

AREMA
Academy for logistics and management

Academy business card

Name of the institution: AREMA, Academy for Logistics and Management, Rogaška Slatina

Short name of the institute: AREMA

Address: Kidričeva ulica 28, 3250 Rogaška Slatina, Slovenia

Website: www.arema.si

Email address: info@arema.si

Phone number: 040 416 250

Registration number: 6280196000

VAT identification number: SI98145258

Transaction account: SI56 6100 0000 9058 886

Establishment: 27.12.2012 entry in the court register

Accreditation of the institute: Decision NAKVIS No. 0141-20/2012/40, dated 19th of June 2014

Founder: IC Prah, d.o.o.

Responsible person: M.Sc. Igor Prah, president

Dean: Assoc. Prof. dr. sci. Patricija Jankovič, lawyer

“True teachers are those who use themselves as bridges over which they invite their students to cross; then, having facilitated their crossing, joyfully collapse, encouraging them to create their own.”

1 Where are we?

AREMA is located in Rogaška Slatina, a town in Slovenia with about 5,000 inhabitants. The municipality of the same name, which lies in the northeast of the Zgornjsotelsko gričevje along the southeastern border of Slovenia, under the slopes of Boč.

Rogaška Slatina is located in Severno Posotelje, in the eastern and central part of Styria. Its geographical location is 46° 14' 50" north latitude and 15° 35' 46" east longitude. It lies at 228 meters above sea level and is part of the Savinja statistical region. It measures 71.5 km² and ranks 100th among Slovenian municipalities in terms of area.

2 Who are we?

AREMA is the only private academy in Slovenia that provides education in the field of management in transport logistics (1st Bologna degree).

Our mission and fundamental goals are providing quality studies in the field of transport logistics management and thus contribute to strengthening the role of science and high technologies in the development potential of regions and society in general. With this, we want to make a decisive contribution to economic strength and harmonious social development. AREMA's cooperation with domestic and foreign universities, higher education institutes, institutes and other organizations and business partners is aimed at the steady, equal and sustainable development of regions in Europe and in Slovenia, as well as the development of scientific disciplines and professions in the study program carried out by AREMA.

The involvement of students, not only in educational work, but also in research and project work, is the red thread of the institute's mission, which builds its operations on mutual respect, understanding between different cultures, nations and languages, and on high moral and ethical standards.

The development, preservation, deepening and dissemination of knowledge and the promotion of academic freedom and creativity without limitation, for the benefit of teachers and students, represent a fundamental value without which we cannot and do not want to imagine the operations of AREMA.

Mission

AREMA's mission is to provide quality studies in a developing and innovative environment and to promote, disseminate and create new knowledge and skills for responsible and sustainable management of regional resources, in the field of management and transport logistics.

With this, we want to contribute to economic strength, harmonious social development and at the same time enable the competitive integration of students into the domestic and international working environment.

Vision

Our vision is to become and remain a reputable, nationally and internationally recognized educational institution that enables students to use and fully develop their abilities. We want to become a centre of excellence that closely interweaves research with education and the development of innovations, strengthens cooperation with the economy and promotes knowledge as a fundamental asset of man and society.

Strategic directions

- Inclusion of domestic and foreign experts from practice and recognized foreign pedagogues and researchers in the operation of the institution,
- Active promotion of self-initiative and creativity of students in educational and research work,
- Increasing the share of marketing and research activity,
- Pedagogical and research excellence in the domestic and international environment

Key values

- consistent performance of all employees, participants and students in accordance with the UNESCO declaration;
- the development, preservation, deepening and dissemination of knowledge and the promotion of academic freedom and creativity without limitation, for the benefit of teachers and students and the immediate and wider community.
- acting on mutual respect, understanding between different cultures, nations and languages and on high moral and ethical standards.

3 Study at AREMA

What are our advantages?

EXPERTS

Recognized experts from business and non-business participate in the study. During their studies, students get to know the presidents of the boards of foreign and domestic companies, as well as representatives of the public administration, who directly pass on their experience to the students.

PRACTICAL CURRICULUM

The curriculum is carefully planned and does not contain content that the manager does not need in the performance of his/her profession. The courses are aimed at practicality and usability!

SOLVING SPECIFIC PROBLEMS

The study is focused on solving concrete problems, so every theory is applied in practice. As part of studies, students are given tasks with which they solve real problems in companies and other institutions.

EMPLOYABILITY

The study program is interdisciplinary and globally oriented and thus competitive on the domestic and European labour market.

INDIVIDUAL APPROACH

Study takes place in small groups, where the flow of knowledge from the lecturer to the student is direct, the lecturers are available to every student on a daily basis.

INTERNATIONAL COMPARABILITY

Comparability and recognition of completed obligations, exams and diplomas ensure the consistency of studies according to the Bologna system, which enables transition and continuation of studies at domestic and foreign universities.

4 Management of transport logistics (MTL)

Is a different and attractive study program, with a modern approach to learning management, a curriculum without unnecessary ballast and with life content. It is the study for knowledge with which you will create your own future.

Despite the fact that it is a study of the first Bologna level, the program is distinctly interdisciplinary (transport, logistics, law, economics, human resources), with an emphasis on the use of modern information technology in the process of managing transport and logistics systems.

Graduates of MTL study program will, in addition to basic knowledge in the fields of business and administrative sciences, economics, management, informatics, transport and logistics, also acquire specialized knowledge and competences in the field of transport logistics management in an international environment. Entrepreneurship, creativity and competence for innovation are key determinants for the adaptability and employability of graduates.

The MTL study program is comparable to related programs abroad. Graduates of the program will therefore also be interesting for the international recruitment of graduates and will thus promote the free flow of labour in Europe.

We are creating the image of a graduate who will be qualified to record the problem and analyse it and predict operational solutions in the organization's logistics processes, transport logistics, who will master standard methods, procedures and processes in logistics and management processes.

Our graduate is qualified to use the acquired theoretical knowledge in practice, is autonomous in his professional work, and is committed to professional ethics. He is able to solve specific work problems using information and communication technology in his specific work area of expertise. The Transport Logistics Management study program is intended

for those who want to start or upgrade their professional career in medium and small companies in the field of logistics or to establish their own companies. The needs of personnel in the field of logistics and knowledge of management are most evident in small and medium-sized companies. But even companies that do not deal directly with logistics services

show an increased need for this profile of graduates. These are, for example, traders with large and continuous warehouses or manufacturing companies. Here, it is necessary to point out the practical orientation of the study, which gives our graduates even better employment opportunities.

Practical training

Practical training is considered a study obligation and are a necessary component of undergraduate study programs. Due to the practical orientation of the study program, practical training will be in the form of case studies or other professional and research or project tasks, carried out in economic and non-economic organizations, in private and in public sector. In practice and for practice.

AREMA has concluded agreements on practical training of students with both economic and non-economic legal entities in Slovenia and, if the student wishes, also abroad.

Tutoring

At AREMA, we organized the tutoring system within the framework of the Center for Career Development and International Cooperation. We systematically guide students through their studies, namely in the field of their academic or research development and in the field of their personal development.

5 International cooperation

International cooperation and integration into the common European higher education space is ensured at AREMA through exchanges of students and university teachers, through the implementation of international quality systems, through participation in EU programs. The subjects of the study program are evaluated according to the international credit system (European

Credit Transfer System - ECTS), and the programs are comparable to similar ones at other higher education institutions abroad, which enables the study programs to be effectively included in the inter-university or international exchange of students (e.g. in the framework of Erasmus programs or in the framework of bilateral agreements).

Erasmus+

Erasmus+ je program Evropske unije, ki naslavlja mednarodno sodelovanje na področju izobraževanja, usposabljanja, mladih in športa. Namen programa Erasmus+ je dvig kakovosti izobraževanja in usposabljanja ter s tem krepitev socialne kohezije in konkurenčnosti gospodarstva Unije.

Erasmus+ želi omogočiti sodelovanje čim večjemu številu posameznikov, še zlasti tistim iz okolij z manj priložnostmi, ter kot ključne izpostavlja vsebine in aktivnosti vključevanja in raznolikosti, trajnostnega razvoja (zeleni Erasmus+), digitalnega prehoda in aktivne participacije oz. sodelovanja v demokratičnem življenju.

Program omogoča sodelovanje med institucijami, ki izvajajo izobraževanje in usposabljanje, vse od vrtcev do univerz ter izobraževalcev odraslih. V projektih lahko sodelujejo tudi druge institucije (podjetja, združenja, društva ipd.), ki se kakor koli navezujejo na aktivnosti področja. Preko aktivnosti posamezniki pridobijo različne osebne in strokovne

spretnosti in kompetence, v tujini opravijo študijske obveznosti ali praktično usposabljanje, razširijo mrežo poznanstev in poznavanje sistemov izobraževanja po različnih državah. Institucije prav tako pridobijo nova znanja, različne metode dela, ki dvignejo kakovost njihovega delovanja in sposobnost za mednarodno sodelovanje.

In 2016, the institute obtained the ERASMUS university charter (Erasmus University Charter-EUC) for the first time, and in 2021 it was extended until 2027.

The number of the Erasmus charter is
270495-EPP-1-2016-1-SI-EPPKA3-ECHE

The Erasmus ID code is
SI ROGASKA01.
