

## QUALITY POLICY

AREMA – Academy of Logistics and Management is committed to the continuous improvement of quality across all areas of its activities. The Quality Policy expresses the shared values and strategic orientations that we pursue together with students, employees, external associates, employers and the wider community.

Our Quality Policy is based on the following principles:

- Excellence in education – providing modern, internationally comparable and reliable study programmes that are based on the needs of professional practice and sustainable development.
- Use of digital tools and elements of hybrid learning – ensuring the quality of studies through the support of digital environments that enhance flexibility, accessibility and modern pedagogical approaches.
- Professional, applied, developmental and research work – linking studies with research, professional and innovation activities and involving students in these activities.
- Student-centred approach – respecting the diversity, needs and interests of students and providing appropriate support, tutoring and conditions for their personal and professional development.
- International engagement – strengthening cooperation in international projects, networks and mobility, and promoting the delivery of content in foreign languages where appropriate and legally permissible.
- Engagement with the wider community – close cooperation with the business sector, public institutions and civil society, and the transfer of knowledge into practice.
- Ethics and integrity – academic honesty, ethical research and zero tolerance for breaches of integrity.

- Transparency – openness, accessibility and the regular public disclosure of key quality-related information.

The Quality Policy forms an integral part of AREMA's strategic plan. It is regularly reviewed and approved by the Senate, at least once every three years, and updated as necessary in accordance with legislation, developments in the field and stakeholder expectations.
